Press kit

The Idea of creation of the social network for Muslims belongs to the personnel of IT Academy - Maxim Suhodolsky (Author), Tahir Tuhtarov (Developer and General manager of the project), Larisa Miroluybova (Director and founder of the Computer Academy "Binom"), and a group of programmers.

We united together having an aim to create special Muslim platform to support positive changes in Islam world. Lots of people around the Globe follows the traditional universal values and want to defend their families and themselves from all the negative information, homosexual propaganda, nazism, violence, terrorism, drugs, etc. They need a special internet environment where they can communicate, share information, develop themselves and at the same time do not have a fear to meet with mentioned negative content.

Indeed, this is the reason why this idea appeared in IT environment, because IT specialists have no boarders. All together we created "Suhba" project (From Arabic language Suhba translated as "Community"). The first name of the project was "Ziyarat", it included World Social Network for Muslims - "Suhba" which is based on multi goal platform designed for a variety of internet services interesting for a modern Muslim.

"Suhba" relies on Halal market potential, one of the most fast growing sectors of World economy. We help people with common ethical values, but sometimes different religions and nationalities freely communicate with each other being together in one safe information environment. We support traditional family values, multinational nature of people and healthy living, as the main features that unites people globally. "Suhba" is a pure internet environment which makes it safe for children and their parents who don't have to worry about the moral security of their children.

Starting from March 2013 "Suhba" project developers did a great job. "Suhba" is a Company with multi goal business model. We have our profit by making solution for business communication, marketing and sales, providing services for advertisement. .

Muslim social network

Suhba LLC
420073 Kazan Russia
Gvardeyskaya street 33, ofc. 314
mail: info@suhba.ru
site: suhba.net
phone: +7 (843) 292 48 48

Suhba Includes:

1. "Suhba Connect" Project

This is analogue of messenger applications such as WhatsApp, Viber, Skype but with higher functionality and fully integrated with all other Suhba projects and right now it is working.

2. "Suhba Market" Project

It is an electronic platform based on "Suhba" Social Network. It supports integration with other outside applications. This platform stimulates sales of Halal industry companies to Muslim customers. It is integrated in its own pay system and works according to the Muslim Law. It is also integrated into "Suhba" Social Network. The project is implemented by 70%

3. "Suhba Pay" Project

"Suhba Pay" system created to accompany the sales processes within "Suhba Market" Project and other payments inside all integrated "Suhba Group" services

4. "Suhba Search" Project

This is internet search engine for Muslims based on Halal principles. It supports multilevel filtration system

5. "Suhba mail" Project

Suhba provides each social network user with its own email with the following domens: suhba.ru, suhba.net, for example: mail@suhba.net Right now Project is finished and ready to work.

6. "Suhba Network" Project

Mobile version of the World Social Network for Muslims "Suhba". Project is finished and now works in testing mode.

7. "Suhba Fund" Project

The Fund for the Muslim Internet Support or "Suhba Fund" provides financial support for development of the World Social Network for Muslims "Suhba" and other Muslim Social Media, where content is associated with the traditional norms of morality. Among the Fund priorities are the Projects united with the idea of creation a united Muslim internet-platform aimed to promote positive changes in virtual Muslim community. In future we plan to support other socially important charity projects.

8. "Suhba Mosque" Project

This application made for those who love beautiful Mosques. It helps to watch the most unique photos of Mosques around the Globe and put them as a wallpaper on the phone. If you want to install any of pictures as a wallpaper you need to be connected to the Internet. After the application will download all the pictures and they would be saved on SD card and the connection to the internet won't be needed.

9. "Suhba Sadaka" Project

This is an online service made to help poor people. Here destitute people can receive help and those who want to help will be able to provide this support to any relevant person.

All these projects are on different levels of readiness, some of them are under testing process. For instance "Suhba Connect" messenger and World social network "Suhba" are working in beta testing regime, Social network started working from May 2015. It updates daily with newly registered users. Today our Company has its own Office, Data Centre, Education Centre and excellent Developers Team. Also we building up all necessary business processes to do successful promotion of our products.
